Emily,
Regarding the new database, do our subs need to add only people that need access to the database or do they also need to add all of their A2A personnel even if they don't all need database access? As in the past, not all of their A2A personnel need access to the database. From what I can tell so far of the new database, it looks like anyone that is added has at least limited access to the database. And since they're not entering all of their services into the database for IPCP purposes, I wasn't sure if it was still necessary for all A2A personnel to be entered in. Please advise.

Thank you!
Carrie
